Amsterdam, Netherlands

AI Engineer and career changer with a background that spans science, digital operations, marketing and hands-on product building. I design and build generative AI applications, autonomous agents and RAG systems that solve real business problems — most recently DropOperator, a production-ready multi-agent platform I built from the ground up. Before transitioning into AI, I spent 11+ years running cross-functional projects across e-commerce, branding, digital marketing and the music industry — record releases, tours and TV appearances — delivering 40+ major campaigns since 2017. I bring technical depth together with real business instinct, and I take full ownership of what I build. I'm now focused full-time on AI engineering, carrying that decade of cross-functional delivery into how I build and ship AI systems.

EDUCATION

AI ENGINEERING BOOTCAMP

Ironhack · 2026

Intensive 400-hour bootcamp — hands-on projects and collaborative, real-world problem-solving across generative AI, LLMs, RAG systems, agents and machine learning.

BSC BIOCHEMISTRY

Vilnius University, Lithuania

Analytical & research methodology · data-driven scientific investigation.

TECHNICAL SKILLS

AI / GenAI: LangGraph · LangChain · RAG · LLM Applications · Agents · Prompt Engineering · Embeddings · Evaluation

BACKEND: Python · FastAPI · SQL · REST APIs · OOP · Git · Bash

FRONTEND: Next.js 14 · TypeScript · React · Tailwind CSS

ML / NLP: NLP · Supervised & Unsupervised Learning · Neural Networks · Deep Learning · Computer Vision

DATA: NumPy · Pandas · Data Analysis · Data Visualisation · Regex & Text Processing · Vector data bases

CLOUD: AWS Cloud Practitioner · Cloud fundamentals · Core AWS services

FUNCTIONAL & SOFT SKILLS

LEADERSHIP: Team management · Cross-functional coordination · Full project ownership end-to-end

COMMUNICATION: Stakeholder management · Client-facing · Clear cross-team communication

DIGITAL: E-commerce · CMS · Brand identity & campaign planning · Artist & event management

LANGUAGES

English	Fluent
Lithuanian	Native
Dutch	B2
Russian	Conversational

AI ENGINEERING — PROJECTS

■ DROPOPERATOR — MULTI-AGENT MUSIC RELEASE PLATFORM

SINCE 2026

Ironhack AI Engineering Bootcamp · solo build, architecture to deployment

- **End-to-End AI Product:** Engineered a live platform that transforms audio uploads or YouTube URLs into complete release strategies—automatically generating dated timelines, Spotify editorial pitches, PR press campaigns, and social media roadmaps.
- **Multi-Agent & RAG Engine:** Built an autonomous LangGraph (ReAct) agent using xAI Grok & GPT-4o with dynamic tool calling and Pinecone RAG over domain-specific marketing knowledge.
- **Audio ML & Full-Stack Cloud:** Integrated Essentia TensorFlow (400-class genre ML) and AssemblyAI with a FastAPI backend and Next.js 14 / Supabase frontend; shipped live on Vercel & Render.

■ NLP PIPELINES — PRODUCTS FEEDBACK CLASSIFICATION

2026

- Engineered an NLP end-to-end pipeline for Amazon review analysis: combined TF-IDF and Sentence Transformers embeddings with K-Means clustering, integrating VADER sentiment analysis and a fine-tuned RoBERTa model for high-accuracy feedback classification.

■ CNN & DEEP LEARNING — COMPUTER VISION CLASSIFICATION

2026

- Built an end-to-end computer vision classifier to streamline visual data sorting: iteratively evaluated custom CNN models on CIFAR-10 using Data Augmentation, Batch Normalization, and Dropout to reduce overfitting and deliver high-accuracy object detection.

PREVIOUS CAREER — MARKETING & OPERATIONS

11+ years of cross-functional delivery ahead of the pivot into AI engineering.

■ ARTIST MANAGER

SINCE 2019 (scaling back)

Requiem

- Leads the band's management, working with the band team on release strategy, national touring, bookings and concert logistics.
- Manages the full release cycle: Spotify editorial pitching, radio campaigns, 3 vinyl releases and merchandise — grew Spotify listeners from 0 to 15K a month and passed 2 million YouTube views.
- Runs a social media team handling daily content and audience growth.

■ MARKETING MANAGER

2017 – 2026

Lost in Amsterdam & freelance clients

- Led end-to-end marketing strategy across hospitality and e-commerce, juggling several live projects at once, always delivered on time.
- Owned web design, graphic design and digital presence: CMS management, e-shop operations, product listings and brand identity.

■ E-COMMERCE MANAGER

2015 – 2023

Procare

- Ran a 1,000+ product online shop day-to-day alongside an in-house development team — inventory, pricing, product listings, order fulfilment and blog/page content.

WHY THIS BACKGROUND TRANSLATES

- **Unique Cross-Disciplinary Edge:** Combines production-level AI engineering with 11+ years of experience across digital marketing, artist management, and e-commerce—bridging advanced technology with commercial strategy and creative execution.
- **Proven Track Record of Shipping:** 10+ years of turning ideas into shipped products, campaigns, and digital experiences, from physical to digital products, marketing initiatives to full-stack AI applications.
- **Rigorous Scientific Foundation:** BSc in Biochemistry brings a research-driven approach to engineering—using hypothesis-driven experimentation, systematic evaluation, and data-backed optimization to build, test, and continuously improve AI systems.
